HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

DETAILED ACTION

Claims 1, 5-16, 20, and 22 are pending.

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/17/2009 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

20. (currently amended) A tangible computer-readable medium ~~comprising instructions written thereon in the form of~~ having stored thereon a bitstream that configures an integrated circuit comprising programmable logic, the computer-readable medium comprising:

an configuration boot program portion of the bitstream that runs a microcontroller on the integrated circuit; and

an encrypted bitstream portion of the bitstream containing encrypted configuration data that when decrypted and loaded into a configuration data register on the integrated circuit configures the programmable logic,

wherein the configuration boot program further comprises instructions for a decryptor, wherein the configuration boot program stores the instructions for the decryptor in a memory, wherein the decryptor is executed by a microcontroller and decrypts the encrypted bitstream using key data stored within a key storage register, and wherein access to the key storage register by the microcontroller is selectively permitted by blocking or unblocking a signal path coupling the microcontroller to the key storage register according to whether a program counter of the microcontroller specifies an address within an address range corresponding to the decryptor within the memory, wherein the decryptor loads the configuration data register with the decrypted bitstream, the configuration data register is readable by the microcontroller before the decryptor is used, and the configuration data register cannot be read by the microcontroller after the decryptor is used.

22. (Previously Presented) The tangible computer-readable medium of claim 20, wherein the configuration boot program comprises instructions for a decompressor.

Allowable Subject Matter

Claims 1, 5-16, 20, and 22 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art teaches a microcontroller within the integrated circuit for receiving an encrypted bitstream; a key storage register coupled to the microcontroller for storing key data; a decryptor coupled to the key storage register, wherein only the decryptor reads from the key storage register; and a configuration data register in the integrated circuit.

The prior art fails to teach wherein the configuration data register is readable by the microcontroller before the decryptor is used and the configuration data register cannot be read by the microcontroller after the decryptor is used, wherein the system further comprises hardware, independent of the microcontroller, that allows the microcontroller access to the key storage register by unblocking a signal path coupling the microcontroller and the key storage register when a program counter of the microcontroller specifies an address within an address range corresponding to the software decryptor within the memory and disallows the microcontroller access to the key storage register by blocking the signal path coupling the microcontroller and the key storage register.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RANDAL D. MORAN whose telephone number is (571)270-1255. The examiner can normally be reached on M-F: 7:00 - 4:00.
